# Gala raises over \$525,000

The spectacular 2018 Holidays d'Eleganz Gala was a major success. With more than 350 attendees, this event raised over \$525,000. Proceeds supported the latest technological innovations in cardiac, acute rehabilitation, orthopedics, cancer, and maternity care—keeping Dominican on the leading edge of everything from emergency medicine to the most complex robotic surgical procedures.

“This past event was the most successful yet. I became chair of the Holidays d'Eleganz committee in 2017 when the event consisted of a Luncheon and Gala,” says Rodney Terra, FTG Builders. “As a sponsor, I

also supported the strategic shift to a one-day event. This has made it easier for attendees to gather and really make a huge impact on fundraising for such great causes, not to mention giving a real meaning to the party atmosphere.”

At the event, this year's triple-impact Fund-the-Need supported Dominican Hospital's new Outpatient Rehabilitation Center, a new Ultrasound machine, and an Advanced Multipurpose Patient Simulator.

Over the years, Holidays d'Eleganz has gained significant recognition in our community. Founded in 1987, the annual event has raised over \$4.8 million for patient care at Dominican Hospital. We look forward to this year's annual gala on November 16, 2019.

## SUPPORTING PHYSICAL THERAPY WITH NEW TECHNOLOGY

A new musculoskeletal sonography ultrasound machine allows therapists to see inside patients' hands in order to identify issues causing pain or impairment, and restore hand function.

Supporting pediatric physical therapy for children with sensory or motor delays plus pediatric speech assessment and therapy. Non-verbal pediatric patients greatly benefit from technology.

## DID YOU KNOW?

Dominican Hospital's Outpatient Rehabilitation Center is the largest outpatient rehabilitation center in Santa Cruz County. We are also the county's sole provider of outpatient Neurological Physical and Occupational Therapy, pediatric (bilingual) speech therapy and occupational therapy, and our bionic walker, the EksoGT robotic gait trainer.

## LABOR AND DELIVERY ULTRASOUND

With a new ultrasound machine patients will know, within minutes rather than hours, the status of their pregnancy, protecting their baby and ensuring the best possible course of action.

## IMPROVING PATIENT CARE THROUGH ADVANCED SIMULATION

To provide advanced training for nurses, the "Advanced Multipurpose Patient Simulator" by GAUMARD® is an adult mannequin with over 100 different anatomical and simulation capabilities.
